

AMENDMENT TO THE SPECIFICATION

Please replace the paragraph beginning at page 4, lines 4 to 12, with the following rewritten paragraph:

-- Referring to Figs. 3 and 4, the similar way of connection can be used for the connection of hub 100 and spokes 30. The hub 100 comprises a plurality of holes 101 defined through flanges 102 thereof and each hole 101 has a connection member 40a extending therethrough. Each connection member 40[[a]] has a curve shank 42 and a head which is located at an outside of the flanges, and a distal end of the curve shank 42 has a threaded portion 41a located beyond the hole 101 and at inside of the flanges. The threaded portion 41[[a]] is threadedly connected to a threaded hole 31 defined longitudinally in an end of the spoke 30. --
